Summary

Cybersecurity Specialist #

In the ever-evolving digital landscape, I serve as a Cybersecurity Specialist with a mission to fortify and defend against the myriad threats that seek to compromise our digital assets. With a keen understanding of the intricate world of cybersecurity, my role is centered on safeguarding information systems, networks, and data from unauthorized access, breaches, and vulnerabilities.

As a Cybersecurity Specialist, I orchestrate a symphony of security measures, leveraging a diverse arsenal of tools and techniques. From designing and implementing robust security architectures to monitoring for anomalies and responding swiftly to incidents, I am committed to upholding the highest standards of security.

My daily tasks include but are not limited to:

- Assessing and mitigating vulnerabilities
- Managing firewalls, intrusion detection/prevention systems, and antivirus solutions
- Conducting penetration testing to identify weaknesses
- Ensuring compliance with industry standards and regulations
- Staying vigilant in the face of emerging threats and adapting security strategies accordingly

In this dynamic field, adaptability is key, and I stay on the cutting edge of cybersecurity practices. I take pride in securing the digital realm, protecting critical data, and ultimately contributing to a safer, more resilient digital world.

Experience

Technical Center

Taldor

Mar 2024 - Present (3 months)

A "Technical Center" job typically involves tasks related to research, development, testing, and innovation within a specific technical field or industry. Professionals in this role often work on designing, optimizing, and troubleshooting technical systems, processes, or products. They may conduct experiments, analyze data, collaborate with cross-functional teams, and provide technical support or guidance. The specific responsibilities can vary widely depending on the industry and company, but the primary focus is on leveraging technical expertise to solve problems and drive advancements in the field.

Coffee Bar Attendant

COFFEE SHOP AROMA

Jan 2021 - Mar 2024 (3 years 3 months)

Coffee Preparation: Coffee Bar Attendants brew coffee, espresso, and other coffee-based beverages according to established recipes and standards. They must ensure the quality and consistency of the beverages.

Customer Service: They greet customers, take orders, and provide information about the coffee menu. Attendants are often responsible for offering a friendly and welcoming atmosphere, making customers feel comfortable and valued.

Cash Handling: Handling transactions, processing payments, and making change accurately are common responsibilities of Coffee Bar Attendants. They should also keep track of sales and receipts.

Maintenance: Maintaining cleanliness and tidiness in the coffee bar area is essential. This includes cleaning coffee machines, countertops, and other equipment, as well as restocking supplies as needed.

Food Service: In some coffee bars, Attendants may also serve pastries, sandwiches, or other snacks. They ensure that food items are presented neatly and serve them to customers.

Knowledge of Products: Coffee Bar Attendants should have a good understanding of the various coffee and tea options available, as well as any specialty offerings. They may be responsible for educating customers about different blends and brewing methods.

Technical Staff

Dorix

Jul 2022 - Jul 2022 (1 month)

In a general sense, Technical Staff are employees who work in technical roles to support various aspects of a company's operations. Their responsibilities can include:

Technical Support: Providing assistance and troubleshooting for technical issues that may arise within the company, which can involve helping employees with IT problems, resolving equipment malfunctions, or addressing software-related issues.

Project Assistance: Assisting in various technical projects or initiatives within the company. This might involve tasks such as data analysis, research, or working on engineering projects, depending on the company's focus.

Maintenance: Conducting maintenance and repairs on technical equipment or machinery to ensure proper functioning. This could be relevant in industries like manufacturing or utilities.

Documentation: Keeping detailed records of technical processes, equipment, and procedures to ensure that they are well-documented and easy to understand for other staff members.

Training: Providing training or guidance to other employees, especially those who may not have a technical background, to help them use certain technologies or equipment effectively.

Quality Control: Ensuring that products or services meet quality standards, which may involve running tests, inspections, and reporting any defects or issues.

Research and Development: In some cases, Technical Staff might be involved in research and development efforts, working on innovative solutions or new technologies.

Compliance: Ensuring that the company's technical operations adhere to relevant regulations and standards, such as data privacy or industry-specific requirements

Education

 **ה'חממה' להכשרת דור העתיד של תעשיית ההייטק | HackerU - האקריו**
Bachelor of Arts - BA, Cyber/Computer Forensics and Counterterrorism

May 2022 - Aug 2023

Studied the dynamic field of Cyber/Computer Forensics and Counterterrorism, exploring the intersection of cybersecurity, digital investigations, and national security. Acquired expertise in digital forensics, incident response, cyber threat intelligence, counterterrorism strategies, and ethical hacking. Developed skills to investigate cybercrimes, proactively defend against threats, and contribute to international security.

Licenses & Certifications

 **web vulnerabilities** - Kontra Application Security Training

Issued May 2023 - Expires May 2024

4177faad681bb79d56e7c737800d

 **TDX Arena Penetration Tester** - HackerU (ThriveDX) - האקריו המרכז ללימודי מחשבים - והשמת עובדים בהייטק

Issued Jan 2024 - Expires Jan 2025

 **Android Bug Bounty Hunting: Hunt Like a Rat** - EC-Council Learning
285260

 **Introduction to Dark Web** - EC-Council Learning

 **Ethical Hacking Essentials** - EC-Council Learning

 **High School Diploma** - ORT Israel, Technology & Science Educational Network רשת אורט ישראל
